

2021 - :Core - Industry Solutions

Views

Order Entry
Floor Plan, Elevations, 3D, & Assembly
Elevation Cross Sections
Save 3D Camera Views
Room Walk Throughs
Lighting & Textures
Simple Renders

Rooms

Straight, Angled, Curved, Cathedral, Vaulted, & Peninsula Walls
Shape Walls from Elevation View
Define Ceilings & Floors
Import & Export Rooms

Parts & Materials

Typical Hardware Specification
Import 3D Models for Materials
Create Material Aliases and Kits
Create Composite Materials
Custom & Predefined Connector Materials
Custom Profiles
Custom Molding and Molding Set Materials
Add Intelligence to Parts
Change Material, Dimensions, & Shapes of Parts
Parametric Part Shaping (Simple Constraints)

2D CAD & Drawings

Static Drawing Scenes
Create & Save Titleblocks
Draw & Modify Lines, Polylines, Rectangles, Circles, & Arcs
Fillet, Chamfer, & Join Lines
User Dimensioning
Annotation Arrows
Group Multiple CAD Objects

Bidding/Estimating

Basic Job Costing
Configure Material Tax & Markup by Material
Set a Sell Price for Materials

Input & Output

Assembly, Wall Elevation, and Part Sheets
Material Summary
Board/Panel Stock, Door, Drawer, Roll Out, & Face Frame Cut List
Door, Drawer Box, & Roll Out List Report
Door, Drawer Box, & Roll Out Check List
Import/Export Orders (ORD & ORDX)
Import Custom Orders (CSV file)
Import/Export Setup Packages
Import/Export Images
Custom Data Link to 3rd Party Software (Transmit to Factory)
Import 3D DXF
Import SketchUp 2014 Model

2021 - :Core - Industry Solutions

General

User Created Standards

Create & Edit Intelli-Joints

Access to the Object Tree

User Defined Object Intelligence

User Defined Variables

Batch Process Multiple Jobs

Compatible Industry Solutions

*Cabinets

Define Cabinet Construction Methods

Face Frame & Frame Overlay Construction

Frameless & 32 Millimeter Construction

Custom Cabinet Catalog Assemblies

Change Cabinet Name, Size, Hinging, & Price

Define Drawer and Roll Out Construction Methods

Typical Door/Drawer Front/End Panel Configuration

Create Door Profiles

Modify Part Size & Position

Modify Interior and Exterior Assembly Finish

Multiple Toe Kick Types

Full Section Control (Placing & Sizing of Doors, Drawers, etc...)

Mirror Reverse an Assembly

Open Doors & Drawers for Presentations

Full Positional & Rotational Control

Copy & Paste & Place Assemblies

Relate to Part Intelligence Wizard

Drawer Box Section Editor

Dovetail Drawer Specification

Add Moldings to Assemblies

Grain Matching

Save Groups of Assemblies

Radius & Angle Ends

Parallel Line Assembly Shaping

Lock, Unlock, & Renumber Automatic Assembly Numbering

Door Section Editor

Save Alias Assemblies

Combine Multiple Assemblies/Toes in Plan View

Beaded Face Frames & Sub-Frames

Auto-Fill Cabinets

2021 - :Core - Industry Solutions

*Closets

Define Closet Construction Methods

32 Millimeter Construction

Custom Closet Catalog Assemblies

Change Closet Assembly Name, Size, Hinging, & Price

Define Drawer and Roll Out Construction Methods

Typical Door/Drawer Front/End Panel Configuration

Create Door Profiles

Modify Part Size & Position

Modify Interior and Exterior Assembly Finish

Mutliple Toe Kick Types

Full Section Control (Placing & Sizing of Doors, Drawers, etc...)

Mirror Reverse an Assembly

Open Doors & Drawers for Presentations

Full Positional & Rotational Control

Copy & Paste & Place Assemblies

Relate to Part Intelligence Wizard

Drawer Box Section Editor

Dovetail Drawer Specification

Add Moldings to Assemblies

Grain Matching

Save Groups of Assemblies

Radius & Angle Ends

Parallel Line Assembly Shaping

Lock, Unlock, & Renumber Automatic Assembly Numbering

Door Section Editor

Save Alias Assemblies

Wire Baskets

Machining for Wire Baskets

Closet Assemblies

Closet Verticals

Closet Horizontals

Hanging Sections

Angled Shoe Shelves

x2D CAD

Plan & Assembly Cross Section Views
Custom View Layers & Dimensions Styles
Save Drawing Scenes to a Separate File
Live Drawing Scenes
User Defined Drawing Library
Text Prompting Symbols
User Defined Vector Hatching (PAT)
Multi-Line Text
Assembly Leaders
Flip, Mirror, Rotate, & Trim 2D CAD Objects
Scale & Stretch 2D CAD Objects
Offset CAD Objects
2D DXF Import & Export
CAD Saved with Assemblies
Add CAD to Saved 3D Views
Create Live Data Tables ¹
Compatible Additions
+Submittals²
Deep CAD Intelligence
Automated Case Part Operations
Unique pre-formatted Catalog Assemblies
Advanced Door, Drawer Front, & Box Attributes
File drawer rails
Keku clips and other fasteners
Hinge & Plate Attributes
Cam lock Attributes
Drawer Pull Attributes
Shelf Supports & Standards

¹ Cut List data restricted in CABINET VISION Design

² Not compatible with CABINET VISION Design

xBidding

Full Job Costing
Custom Labor Costing
Labor per Part & Assembly
Price by Part
Define Part Pricing Matrices
Create and Assign Vendors to Materials
Access to over 150 Bid Methods
Breakout Bids by Room
Custom Reporting Engine
Export Bid Data for 3rd Party Software
Compatible Additions
+Catalog Editor
Create, Copy, & Edit Catalogs
Custom Pricing Options
Stock Catalog Pricing
Modular End to End Catalogs
Simple Pricing Tables
Create Read Only Catalogs
Create Distributable Catalogs

xCountertops

Define Countertop Construction Methods
Countertop Modifications
Specify Countertop Joint Machining (Tite-Joints/Alignment Boring)
Modify Sink/Cooktop Cut-Outs

xCRM

Manage Jobs by Designer/Engineer
Manage Jobs by Customer
Contact Management (Users, Customers, Vendors, Contractors)
Contact Reports
Job Revision Tracking

HEXAGON | CABINET VISION

xOptimizer

Panel Optimization
Check Sheet Sizes to Fit Machine
Multiple Sheet Size Definition for a Single Material
Automatically Use Larger Sheet Sizes for Oversized Parts
Pattern Diagram Print Outs
Recognizes Grain Match Input
Offcut Manager
Optimization Off-Fall Tracking
Modify Optimization Properties After Optimization
Re-Optimize a Single Material
Cost and Time Report
Send optimized sheet to drawing
Compatible Additions
+Saw
Output to a NC Panel Saw

xRendering

Save renders to image file
Realtime Rendering
Advanced Rendering
Architectural Photorealistic Rendering
Cartoon Rendering
Hand Drawn Rendering
Hatch Rendering
Export COLLADA
Compatible Additions
+Tour
Advanced Realtime Rendered Walkthrough
HDR Backgrounds

xReporting

Over 150 Predefined Reports
User Defined Report Groups
Custom Report Editor
Filter Report Data
Multiple text file type Exports
User Definable Assembly Sheets
User Definable Elevation Sheets
User Definable Part Sheets
Export Report Data
Output Part List to 3rd Party Optimizers

xShaping

Parametric Assembly Shaping (Advanced Constraints)
Parametric Part Shaping (Advanced Constraints)
Parametric Route Shaping (Advanced Constraints)
Part Level CAM Editor and Reports Views
Split Parts
Add & Modify Operations on Parts
Ability to Library Parts
Replace Part w/Library Parts or DXF's
Exploded Assembly View
Edit Part Shape from Room Level
Combine Multiple Assemblies/Toes in Elevation View
Define & Apply Flutes to Parts

xMachining

Open, Save, Import, & Export NC File (.PNC)
Import Blum Dynaplan BXF Files
Save Alphacam Drawing File (Post machines only)
Multiple Primary and/or Secondary Machines
Define Workflows with and Utilize Machine Sets
Integrated Reporting (including basic labels)
Report Editor
Advanced Tool Strategies
Control Feeds and Speeds of Tools by Material
Control Maximum Depth Per Pass of Tools by Material
Manually Add and Copy Parts to Part List
Edit Part Banding
Compensate for Edgebanders with Pre-Mill Stations
Cabinet, Part, Material Filtering
With ALPHACAM Standard or Higher Users
Advanced Toolpath Simulation
Use S2M CENTER Tools within ALPHACAM
Full Modification Capability of S2M CENTER Toolpaths
Save ALPHACAM Operations to the Part Library
Output Native ALPHACAM Operation Cluster
Ball & Bullnose Router
Import ALPHACAM Tools
Edit S2M CENTER Operations within ALPHACAM
Open Job (.pnc) In ALPHACAM
With +3rd Party CAM, +Point to Point, or +Router
Import Custom Layered DXF's
User Defined DXF Layer Schedules
Edit Part Shapes
Add Operations to Parts
Create and Modify Toolsets
Advanced Tool Set Logic
Pocketing for MDF Slats & Shaker Doors
Automatically Add Miter Operations
Part Library
Route Outline Only Of Through Holes
Specify Lead Type Per Part
Specify Outline Tools Per Material
Automatic Tooling and Toolpath Generation
Pocketing of Rectangles and Circles
Display All Machning
Basic Toolpath Simulation
Shaped Router Bits, Saw Tool, V-Bit Tool, Dovetail Tool
Control the order of operations
Pocket Waste
Compatible Additions
+3rd Party CAD Import
Batch Import of 3rd Party CAD Data
+3rd Party CAM
Export Layered Geometry to 3rd Party CAM Applications
+Chop Saw
Output to a Chop Saw

+Drill & Dowel
Output to a Drill & Dowel Machine
+Label
Standalone Label Station Application
Design Labels
Export Real Time Label Info to NC Saws
Show Label Position on Nested/Optimized Sheet
Labels For On-Board Nest Machine Label Systems
2D Bar Code Definition
Show Part On Sheet Graphic
Generate Labels for Saw Off-Cuts (+Saw)
Generate Labels for Nest Off-Cuts (+Router)
+Material Handling
Output to a Material Handling System
+Point to Point
Output to Point to Points (Machining Centers)
Automatic Point-to-Point Runfield Control
Automatic Point-to-Point Mirroring
ABC Axis Rotation
+Part List Export
Output to a CUT File, Custom CUT File, or PNL
+Router
Output to Nested Based Router
Block Nesting, TrueShape Nesting & 6th Face Nesting
Check Sheet Sizes to Fit Machine
Automatically Use Larger Sheet Sizes for Oversized Parts
Multiple Sheet Size Definition for a Single Material
Control Lead-In/Out Offsets
Combine Operations on Part Edge with Part Outline
Linked Part Outline (Bridge) Nesting
Common Line Cutting
Intelligent Small Part Handling (Tabs, Onionskins, Return Onionskins)
Pattern Diagram Print Outs
Import Custom Layered DXF's
User Defined DXF Layer Schedules
Recognizes Grain Match Input
Optimize Gang Drill Operations
First Pass Offset (onion skin)
Add, Drag, Drop, Cut, Copy and Paste Nest Parts
Manually Rotate or Flip Over a Part in A Nest
Move Parts in a Nest
Nest By Cabinet Order
Re-Nest / Add Parts from Library to Existing Nested Sheet(s)
Offcut Manager
Square Up Off-Cuts in Nest
Nesting Off-Fall Tracking
Edit Tool, Trim, and Optimization Properties By Material
Save and Open Nested/Optimized "Ready for Output" Job State
ABC Axis Rotation
Send optimized sheet to drawing

+Saw
Output to a NC Panel Saw
Panel Optimizer
Check Sheet Sizes to Fit Machine
Multiple Sheet Size Definition for a Single Material
Automatically Use Larger Sheet Sizes for Oversized Parts
Pattern Diagram Print Outs
Recognizes Grain Match Input
Offcut Manager
Optimization Off-Fall Tracking
Modify Optimization Properties After Optimization
Re-Optimize a Single Material
Cost and Time Report
Send optimized sheet to drawing
+Simulation
Simulation (+Router or +Point-to-Point and Intelli-CAM NC Link only)
+Special
Output to a Specialized Machine
